Report on Internal Control Over Financial Reporting

The Association's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its Consolidated Financial Statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of June 30, 2015. In making the assessment, management used the framework in *Internal Control — Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association's management concluded that as of June 30, 2015, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Association's management determined that there were no material weaknesses in the internal control over financial reporting as of June 30, 2015.

Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands)

The following commentary reviews the financial condition and results of operations of Carolina Farm Credit, ACA (Association) for the period ended June 30, 2015. These comments should be read in conjunction with the accompanying consolidated financial statements, notes to the consolidated financial statements and the 2014 Annual Report of the Association. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners and farm-related businesses for financing of short and intermediate-term loans and long-term real estate mortgage loans. The Association's loan portfolio is diversified over a range of agricultural commodities in our region, including part-time farm, poultry, and rural home loans. Farm size varies and many of the borrowers in the region have diversified farming operations. This factor, along with the numerous opportunities for non-farm income in the area, reduces the dependency on a single agricultural commodity.

The gross loan volume of the Association as of June 30, 2015, was \$1,344,683, a decrease of \$26,508 as compared to \$1,371,191 at December 31, 2014. Net loans outstanding at June 30, 2015, were \$1,337,199, as compared to \$1,364,577 at December 31, 2014. Net loans accounted for 94.48% of total assets at June 30, 2015, as compared to 93.27% of total assets at December 31, 2014. The decrease in loan volume during the reporting period is a result of principal payments and payoffs outpacing new loan volume.

There is an inherent risk in the extension of any type of credit. Portfolio credit quality continues to be maintained at an acceptable level, however, and credit administration remains satisfactory.

Nonaccrual loans increased from \$17,478 at December 31, 2014, to \$18,575 at June 30, 2015. This increase is primarily the result of transfers of loan volume to nonaccrual being more than regular payments made on nonaccrual loans, along with nonaccrual loans liquidated or reinstated back to accrual status.

Association management maintains an allowance for loan losses in an amount considered sufficient to absorb estimated, incurred losses in the loan portfolio based on current and expected future

conditions. The allowance for loan losses at June 30, 2015, was \$7,484 compared to \$6,614 at December 31, 2014.

RESULTS OF OPERATIONS

For the three months ended June 30, 2015

Net income for the three months ended June 30, 2015, totaled \$5,718, as compared to \$6,394 for the same period in 2014, which is a decrease of \$676. Net interest income decreased \$515 for the three months ended June 30, 2015, as compared to the same period in 2014.

Total interest income decreased \$423 during the three months ended June 30, 2015, as compared to the same period in 2014. Interest income recognized on nonaccrual loans was \$58 for the three months ended June 30, 2015, as compared to \$251 for the same period in 2014, a decrease of \$193. Interest expense increased \$92 for the three months ended June 30, 2015, as compared to the same period in 2014.

The Association recorded a provision/(reversal) for loan losses of \$519 for the three months ended June 30, 2015 as compared to a provision/(reversal) of \$393 for the same period of 2014.

Noninterest income for the three months ended June 30, 2015, totaled \$3,574, as compared to \$3,406 for the same period in 2014, an increase of \$168. The increase in noninterest income is attributed to increases of \$212 in loan fees, \$216 in gains/(losses) on the sale of rural home loans, and \$15 in other noninterest income, when compared to the same period in 2014. These increases were offset by decreases of \$19 in fees for financially-related services, \$125 in patronage refunds from other Farm Credit institutions, \$63 in gains/(losses) on sales of premises and equipment, and \$68 in gains/(losses) on other transactions, when compared to the same period in 2014.

Noninterest expense for the three months ended June 30, 2015, increased \$203, as compared to the same period in 2014. This increase in noninterest expense is attributed to increases of \$844 in salaries and employee benefits, \$48 in occupancy and equipment, and \$10 in Insurance Fund premiums, when compared to the same period in 2014. These increases were offset by decreases of \$612 in (gains)/losses on other property owned, and \$87 in other operating expenses, when compared to the same period in 2014.

The Association recorded a provision for income taxes of \$1 for the three months ended June 30, 2015, as compared to a provision of \$1 for the same period in 2014.

For the six months ended June 30, 2015

Net income for the six months ended June 30, 2015, totaled \$12,163, as compared to \$12,941 for the same period in 2014, a decrease of \$778, or 6.01 percent. Net interest income decreased \$894 for the six months ended June 30, 2015, as compared to the same period in 2014.

Total interest income decreased \$486 during the six months ended June 30, 2015, as compared to the same period in 2014. Interest income recognized on nonaccrual loans was \$287 for the six months ended June 30, 2015, as compared to \$588 for the same period in 2014, a decrease of \$301. Interest expense increased \$408 for the six months ended June 30, 2015, as compared to the same period in 2014.

The Association recorded a provision for loan losses of \$733 for the six months ended June 30, 2015 as compared to a provision of \$724 for the same period in 2014.

Noninterest income for the six months ended June 30, 2015, totaled \$7,211, as compared to \$6,684 for the same period in 2014, an increase of \$527. The overall increase is attributed to an increase of \$356 in loan fees, \$590 in gains/(losses) on the sale of rural home loans, and \$7 in other non-interest income, when compared to the same period in 2014. These increases were offset by decreases of \$9 in fees for financially-related services, \$205 in patronage refunds from other Farm Credit institutions, \$31 in gains/(losses) on sales of premises and equipment, and \$181 in gains/(losses) on other transactions, when compared to the same period in 2014.

Noninterest expense for the six months ended June 30, 2015, increased \$402 compared to the same period in 2014. This increase in noninterest expense is attributed to increases of \$1,155 in salaries and employee benefits, \$136 in occupancy and equipment, and \$25 in Insurance Fund premiums, when compared to the same period in 2014. These increases were offset by decreases of \$656 in (gains)/losses on other property owned, and \$258 in other operating expenses when compared for the same period in 2014.

The Association recorded a provision for income taxes of \$1 for the six months ended June 30, 2015 as compared to \$1 for the same period in 2014.

FUNDING SOURCES

The principal source of funds for the Association is the borrowing relationship established with AgFirst through a General Financing Agreement. The General Financing Agreement utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw

funds. The funds are advanced by the Bank to the Association in the form of notes payable. The notes payable are segmented into variable rate and fixed rate sections. The variable rate note is utilized by the Association to fund variable rate loan advances and operating funds requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by the Association. The total notes payable to the Bank at June 30, 2015, were \$1,075,326, as compared to \$1,128,326 at December 31, 2014. The decrease during the period is primarily attributable to the declines in loan volume and the payment of AgFirst patronage to the Association in January.

The Association has no lines of credit outstanding with third parties as of June 30, 2015.

CAPITAL RESOURCES

Total members' equity at June 30, 2015, increased to \$311,695 from the December 31, 2014, total of \$299,229. The change in capital is primarily attributable to net earnings in the current year.

Farm Credit administration (FCA) regulations require all Farm Credit institutions to maintain minimum permanent capital, total surplus and core surplus ratios. These ratios are calculated by dividing the Association's permanent capital, total surplus and core surplus as defined in FCA regulations, by a risk-adjusted asset base. As of June 30, 2015, the Association's total surplus ratio and core surplus ratio were 21.54% and 18.85%, respectively, and the permanent capital ratio was 22.15%. All three ratios were well above the minimum regulatory ratios of 7.00 percent for permanent capital and total surplus ratios and 3.50 percent for the core surplus ratio.

REGULATORY MATTERS

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations.
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption.
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers.
- To comply with the requirements of section 939A of the Dodd-Frank Act Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).
- To modernize the investment eligibility criteria for System banks.
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

On September 4, 2014, the FCA published a proposed rule in the Federal Register to modify the regulatory capital requirements for System banks and associations. The initial public comment period ended on February 16, 2015. On June 15, 2015, the Farm Credit Administration reopened the comment period from June 26 to July 10, 2015. The stated objectives of the proposed rule are as follows:

- To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as a government-sponsored enterprise.
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System.
- To make System regulatory capital requirements more transparent.
- To meet the requirements of section 939A of the Dodd Frank Act.

FINANCIAL REGULATORY REFORM

See discussion of the Dodd-Frank Act in the *Financial Regulatory Reform* section of the Association's 2014 Annual Report.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 1, "*Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements*", in the Notes to the Financial Statements, and the 2014 Annual Report to Shareholders for recently issued accounting pronouncements.

NOTE: Shareholder investment in the Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained at their website, www.agfirst.com. Copies of the Association's annual and quarterly reports are also available upon request free of charge by calling 1-800-521-9952, or writing Christopher H. Scott, CFO, Carolina Farm Credit, ACA, P.O. Box 1827, Statesville NC 28687-1827, or accessing the website, www.carolinafarmcredit.com. The Association prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

Notes to the Consolidated Financial Statements

(dollars in thousands, except as noted)
(unaudited)

Note 1 — Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements

Organization

The accompanying financial statements include the accounts of Carolina Farm Credit, ACA (the Association). A description of the organization and operations, the significant accounting policies followed, and the financial condition and results of operations for the Association as of and for the year ended December 31, 2014, are contained in the 2014 Annual Report to Shareholders. These unaudited interim consolidated financial statements should be read in conjunction with the latest Annual Report to Shareholders.

Basis of Presentation

In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary for a fair statement of results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed.

Certain amounts in the prior period's consolidated financial statements may have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The results of any interim period are not necessarily indicative of those to be expected for a full year.

Significant Accounting Policies

The Association's accounting and reporting policies conform with U.S. generally accepted accounting principles (GAAP) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates based on assumptions about future economic and market conditions (for example, unemployment, market liquidity, real estate prices, etc.) that affect the reported amounts of assets and liabilities at the date of the financial statements, income and expenses during the reporting period, and the related disclosures. Although these estimates contemplate current conditions and expectations of change in the future, it is reasonably possible that actual conditions may be different than anticipated, which could materially affect results of operations and financial condition.

Management has made significant estimates in several areas, including loans and allowance for loan losses (Note 2, *Loans and Allowance for Loan Losses*), investment securities and other-than-temporary impairment (Note 3, *Investments*), and

financial instruments (Note 6, *Fair Value Measurement*). Actual results could differ from those estimates.

For further details of significant accounting policies, see Note 2, *Summary of Significant Accounting Policies*, from the latest Annual Report.

Accounting Standards Updates (ASUs) Issued During the Period

The following ASUs were issued by the Financial Accounting Standards Board (FASB) since the most recent Annual Report:

- 2015-10 Technical Corrections and Improvements – In June, 2015, the FASB issued ASU 2015-10, Technical Corrections and Improvements (numerous Topics). The amendments in the Update represent changes to make minor corrections or minor improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. The amendments that require transition guidance are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. All other amendments were effective upon the issuance of the Update.
- 2015-07 Fair Value Measurement – In May, 2015, the FASB issued ASU 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent). Topic 820 permits a reporting entity, as a practical expedient, to measure the fair value of certain investments using the net asset value per share of the investment. Currently, investments valued using the practical expedient are categorized within the fair value hierarchy on the basis of whether the investment is redeemable with the investee at net asset value on the measurement date, never redeemable with the investee at net asset value, or redeemable with the investee at net asset value at a future date. To address diversity in practice related to how certain investments measured at net asset value with future redemption dates are categorized, the amendments in this Update remove the requirement to categorize investments for which fair values are measured using the net asset value per share practical expedient. It also limits disclosures to investments for which the entity has elected to measure the fair value using the practical

expedient. For public business entities, the guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. For all other entities, the guidance is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. Earlier application is permitted. The guidance is to be applied retrospectively to all periods presented. Application of this guidance is not expected to have an impact on the Association's financial condition or results of operations, but will require modifications to footnote disclosures.

ASUs Pending Effective Date

For a detailed description of the ASUs below, see the latest Annual Report.

Potential effects of ASUs issued in previous periods:

- 2014-09 Revenue from Contracts with Customers – On July 9, 2015, the FASB voted to delay the effective date by one year. A final ASU reflecting the revised effective date will be issued in third quarter of 2015.

Accounting Standards Effective During the Period

There were no changes in the accounting principles applied from the latest Annual Report, other than any discussed below.

No recently adopted accounting guidance issued by the FASB had a significant effect on the current period reporting. See the most recent Annual Report for a detailed description of each of the standards below:

- 2014-14 Classification of Certain Government-Guaranteed Mortgage Loans – The Association did not have a significant amount of loans that met the criteria of the guidance.

- 2014-11 Repurchase-to-Maturity Transactions – The Association did not have a significant amount of transactions that met the criteria of the guidance.
- 2014-08 Discontinued Operations – The Association has not had and does not anticipate any significant disposals.
- 2014-04 Reclassification of Consumer Mortgage Loans – The criteria of the standard were not significantly different from the Association's policy in place at adoption. The amendment was adopted prospectively. See Note 2, *Loans and Allowance for Loan Losses*, for the additional disclosures required by this guidance.

Note 2 — Loans and Allowance for Loan Losses

The Association maintains an allowance for loan losses at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Association has been identified. See Note 3, *Loans and Allowance for Loan Losses*, from the latest Annual Report for further discussion.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. The Association manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Association sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the board of directors.

A summary of loans outstanding at period end follows:

	June 30, 2015	December 31, 2014
Real estate mortgage	\$ 692,218	\$ 687,531
Production and intermediate-term	560,005	590,611
Loans to cooperatives	385	24
Processing and marketing	19,043	22,319
Farm-related business	11,103	5,135
Communication	6,819	8,786
Energy and water/waste disposal	2,009	2,107
Rural residential real estate	51,922	54,678
International	1,179	–
Total Loans	<u>\$ 1,344,683</u>	<u>\$ 1,371,191</u>

A substantial portion of the Association's lending activities is collateralized, and exposure to credit loss associated with lending activities is reduced accordingly.

The Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with Farm Credit Administration (FCA) regulations. The following tables present participation loan balances at periods ended:

	June 30, 2015							
	Within AgFirst District		Within Farm Credit System		Outside Farm Credit System		Total	
	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold

*Includes the loan types; Loans to cooperatives, Processing and marketing, and Farm-related business.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented. There were no TDRs that occurred during the three and six months ended June 30, 2015 and the three months ended June 30, 2014.

Outstanding Recorded Investment	Six Months Ended June 30, 2014					Charge-offs
	Interest Concessions	Principal Concessions	Other Concessions	Total		
Pre-modification:						
Real estate mortgage	\$ 729	\$ 697	\$ -	\$ 1,426		
Production and intermediate-term	-	2,100	-	2,100		
Rural residential real estate	-	117	-	117		
Total	\$ 729	\$ 2,914	\$ -	\$ 3,643		
Post-modification:						
Real estate mortgage	\$ 715	\$ 700	\$ -	\$ 1,415	\$ -	
Production and intermediate-term	-	2,099	-	2,099	-	
Rural residential real estate	-	100	-	100	-	
Total	\$ 715	\$ 2,899	\$ -	\$ 3,614	\$ -	

Interest concessions may include interest forgiveness and interest deferment. Principal concessions may include principal forgiveness, principal deferment, and maturity extension. Other concessions may include additional compensation received which might be in the form of cash or other assets.

There were no TDRs that occurred during the previous twelve months and for which there was a subsequent payment default during the periods presented. Payment default is defined as a payment that was thirty days or more past due.

The following table provides information at period end on outstanding loans restructured in troubled debt restructurings. These loans are included as impaired loans in the impaired loan table:

	Total TDRs		Nonaccrual TDRs	
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014
Real estate mortgage	\$ 2,659	\$ 9,888	\$ 932	\$ 8,146
Production and intermediate-term	1,716	2,661	1,161	1,486
Farm-related business	7,401	572	6,854	-
Rural residential real estate	116	210	-	92
Total Loans	\$ 11,892	\$ 13,331	\$ 8,947	\$ 9,724
Additional commitments to lend	\$ -	\$ 19		

The following table presents information as of period end:

	June 30, 2015
Carrying amount of foreclosed residential real estate properties held as a result of obtaining physical possession	\$ 100
Recorded investment of consumer mortgage loans secured by residential real estate for which formal foreclosure proceedings are in process	\$ 452

Note 3 — Investments

Investment Securities

The Association's held-to-maturity investments consist primarily of Rural America Bonds (RABs), which are private placement securities purchased under the Mission Related Investment program approved by the FCA. In its Conditions of Approval for the program, the FCA considers a RAB ineligible if its investment rating, based on the internal 14-point risk rating scale used to also grade loans, falls below 9 and requires System institutions to provide notification to FCA when a security becomes ineligible. At June 30, 2015, the Association held no RABs whose credit quality had deteriorated beyond the program limits.

A summary of the amortized cost and fair value of investment securities held-to-maturity follows:

	June 30, 2015				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
RABs	\$ 1,916	\$ -	\$ (119)	\$ 1,797	5.07%

	December 31, 2014				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
RABs	\$ 2,099	\$ 6	\$ (122)	\$ 1,983	4.99%

A summary of the contractual maturity, amortized cost and estimated fair value of investment securities held-to-maturity follows:

	June 30, 2015		
	Amortized Cost	Fair Value	Weighted Average Yield
In one year or less	\$ —	\$ —	—%
After one year through five years	36	35	4.25
After five years through ten years	—	—	—
After ten years	1,880	1,762	5.09
Total	\$ 1,916	\$ 1,797	5.07%

A portion of these investments has contractual maturities in excess of ten years. However, expected maturities for these types of securities can differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. The following tables show the fair value and gross unrealized losses for investments that were in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

	June 30, 2015			
	Less than 12 Months		12 Months or Greater	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
RABs	\$ —	\$ —	\$ 1,797	\$ (119)

	December 31, 2014			
	Less than 12 Months		12 Months or Greater	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
RABs	\$ 44	\$ (1)	\$ 1,795	\$ (121)

The recording of an impairment is predicated on: (1) whether or not management intends to sell the security, (2) whether it is more likely than not that management would be required to sell the security before recovering its costs, and (3) whether management expects to recover the security's entire amortized cost basis (even if there is no intention to sell). If the Association intends to sell the security or it is more likely than not that it would be required to sell the security, the impairment loss equals the full difference between amortized cost and fair value of the security. When the Association does not intend to sell securities in an unrealized loss position and it is not more likely than not that it would be required to sell the securities, other-than-temporary impairment loss is separated into credit loss and non-credit loss. Credit loss is defined as the shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis.

The Association performs periodic credit reviews, including other-than-temporary impairment analyses, on its investment securities portfolio. The objective is to quantify future possible loss of principal or interest due on securities in the portfolio. Factors considered in determining whether an impairment is other-than-temporary include among others: (1) the length of time and the extent to which the fair value is less than cost, (2) adverse conditions specifically related to the industry, (3) geographic area and the condition of the underlying collateral, (4) payment structure of the security, (5) ratings by rating agencies, (6) the credit worthiness of bond insurers, and (7) volatility of the fair value changes.

The Association uses the present value of cash flows expected to be collected from each debt security to determine the amount of credit loss. This technique requires assumptions related to the underlying collateral, including default rates, amount and timing of prepayments, and loss severity. Assumptions can vary widely from security to security and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics, and collateral type.

Significant inputs used to estimate the amount of credit loss include, but are not limited to, performance indicators of the underlying assets in the security (including default rates, delinquency rates, and percentage of nonperforming assets), loan-to-collateral value ratios, third-party guarantees, current levels of subordination, vintage, geographic concentration, and credit ratings. The Association may obtain assumptions for the default rate, prepayment rate, and loss severity rate from an independent third party, or generate the assumptions internally.

The Association has not recognized any credit losses as any impairments were deemed temporary and resulted from non-credit related factors. The Association has the ability and intent to hold these temporarily impaired investments until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities, especially after considering credit enhancements.

Investments in other Farm Credit Institutions

The Association is required to maintain ownership in AgFirst Farm Credit Bank (AgFirst or the Bank) of Class B and Class C stock as determined by the Bank. The Bank may require additional capital contributions to maintain its capital requirements. The Association owns 6.05 percent of the issued stock of the Bank as of June 30, 2015 net of any reciprocal investment. As of that date, the Bank's assets totaled \$28.8 billion and shareholders' equity totaled \$2.4 billion. The Bank's earnings were \$168 million for the first six months of 2015. In addition, the Association has an investment of \$479 related to other Farm Credit institutions.

Note 4 — Debt

Notes Payable to AgFirst Farm Credit Bank

The Association's indebtedness to the Bank represents borrowings by the Association to fund its earning assets. This indebtedness is collateralized by a pledge of substantially all of

the Association's assets. The contractual terms of the revolving line of credit are contained in the General Financing Agreement (GFA). The GFA also defines Association performance criteria for borrowing from the Bank, which includes borrowing base margin, earnings and capital covenants, among others.

Note 5 — Members' Equity

Accumulated Other Comprehensive Income (AOCI)

	Changes in Accumulated Other Comprehensive Income by Component (a)			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Employee Benefit Plans:				
Balance at beginning of period	\$ (1,309)	\$ (386)	\$ (1,329)	\$ (432)
Other comprehensive income before reclassifications	—	—	—	—
Amounts reclassified from AOCI	20	46	40	92
Net current period other comprehensive income	20	46	40	92
Balance at end of period	\$ (1,289)	\$ (340)	\$ (1,289)	\$ (340)

	Reclassifications Out of Accumulated Other Comprehensive Income (b)				
	Three Months Ended June 30,		Six Months Ended June 30,		Income Statement Line Item
	2015	2014	2015	2014	
Defined Benefit Pension Plans:					
Periodic pension costs	\$ (20)	\$ (46)	\$ (40)	\$ (92)	See Note 7.
Net amounts reclassified	\$ (20)	\$ (46)	\$ (40)	\$ (92)	

(a) Amounts in parentheses indicate debits to AOCI.

(b) Amounts in parentheses indicate debits to profit/loss.

Note 6 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

The classifications within the fair value hierarchy are as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability. The Association has no Level 2 assets and liabilities measured at fair value on a recurring basis.

Level 3 inputs are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

For a complete discussion of the inputs and other assumptions considered in assigning various assets and liabilities to the fair value hierarchy levels, see the latest Annual Report to Shareholders.

There were no Level 3 assets or liabilities measured at fair value on a recurring basis for the periods presented. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the periods presented.

Fair values are estimated at each period end date for assets and liabilities measured at fair value on a recurring basis. Fair values are estimated at least annually, or when information suggests a significant change in value, for assets measured at fair value on a nonrecurring basis. Other Financial Instruments are not measured at fair value in the statement of financial position, but their fair values are estimated as of each period end date. The following tables summarize the carrying amounts of these assets and liabilities at period end, and their related fair values.

At or for the Six Months Ended June 30, 2015						
	Total Carrying Amount	Level 1	Level 2	Level 3	Total Fair Value	Fair Value Effects On Earnings
Recurring Measurements						
Assets:						
Assets held in Trust funds	\$ 3,106	\$ 3,106	\$ –	\$ –	\$ 3,106	
Recurring Assets	\$ 3,106	\$ 3,106	\$ –	\$ –	\$ 3,106	
Liabilities:						
Recurring Liabilities	\$ –	\$ –	\$ –	\$ –	\$ –	
Nonrecurring Measurements						
Assets:						
Impaired loans	\$ 19,814	\$ –	\$ –	\$ 19,814	\$ 19,814	\$ (66)
Other property owned	1,873	–	–	2,051	2,051	(180)

SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain

inputs are interrelated with one another), which may counteract or magnify the fair value impact.

Investment Securities

The fair values of predominantly all level 3 investment securities have consistent inputs, valuation techniques and correlation to changes in underlying inputs. The models used to determine fair value for these instruments use certain significant unobservable inputs within a discounted cash flow or market comparable pricing valuation technique. Such inputs generally include discount rate components including risk premiums, prepayment estimates, default estimates and loss severities.

These level 3 assets would decrease (increase) in value based upon an increase (decrease) in discount rates, defaults, or loss severities. Conversely, the fair value of these assets would generally increase (decrease) in value if the prepayment input were to increase (decrease).

Generally, a change in the assumption used for defaults is accompanied by a directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change

in the assumption used for prepayments. Unobservable inputs for loss severities do not normally increase or decrease based on movements in the other significant unobservable inputs for these level 3 assets.

Inputs to Valuation Techniques

Management determines the Association’s valuation policies and procedures. The Bank performs the majority of the Association’s valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

Quoted market prices are generally not available for the instruments presented below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fair Value	Valuation Technique(s)	Unobservable Input	Range
Impaired loans and other property owned	\$ 21,865	Appraisal	Income and expense	*
			Comparable sales	*
			Replacement cost	*
			Comparability adjustments	*

* Ranges for this type of input are not useful because each collateral property is unique.

Information about Other Financial Instrument Fair Value Measurements

	Valuation Technique(s)	Input
Cash	Carrying Value	Par/Principle and appropriate interest yield
Loans	Discounted cash flow	Prepayment forecast
		Probability of default
		Loss severity
Investment securities, held-to-maturity	Discounted cash flow	Prepayment rates
		Risk adjusted discount rate
Notes payable to AgFirst Farm Credit Bank	Discounted cash flow	Prepayment forecasts
		Probability of default
		Loss severity

Note 7 — Employee Benefit Plans

The following is a table of retirement and other postretirement benefit expenses for the Association:

	Three Months Ended June 30 ,		Six Months Ended June 30 ,	
	2015	2014	2015	2014
Pension	\$ 1,498	\$ 1,518	\$ 2,997	\$ 3,036
401(k)	171	122	263	249
Other postretirement benefits	468	280	935	560
Total	\$ 2,137	\$ 1,920	\$ 4,195	\$ 3,845

The following is a table of retirement and other postretirement benefit contributions for the Association:

	Actual YTD Through 6/30/15	Projected Contributions For Remainder of 2015	Projected Total Contributions 2015
Pension	\$ 67	\$ 5,954	\$ 6,021
Other postretirement benefits	390	394	784
Total	\$ 457	\$ 6,348	\$ 6,805

Contributions in the above table include allocated estimates of funding for multi-employer plans in which the Association participates. These amounts may change when a total funding amount and allocation is determined by the respective Plan’s Sponsor Committee. Also, market conditions could impact discount rates and return on plan assets which could change

contributions necessary before the next plan measurement date of December 31, 2015.

Further details regarding employee benefit plans are contained in the 2014 Annual Report to Shareholders, including a discussion of benefit plan changes related to the termination of the AgFirst Farm Credit Cash Balance Retirement Plan.

Note 8 — Commitments and Contingent Liabilities

From time to time, legal actions are pending against the Association in which claims for money damages are asserted. On at least a quarterly basis, the Association assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management, after consultation with legal counsel, is of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Association. Because it is not probable that the Association will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

Note 9 — Subsequent Events

The Association evaluated subsequent events and determined there were none requiring disclosure through August 7, 2015, which was the date the financial statements were issued.
